are more likely to be appreciated than those things which are familiar. Yet there is much which is common, much of what is scattered in profusion around us, both in nature and in human life, which nevertheless, is not familiar, but on the contrary passes under our very eyes unseen, and when brought to our attention is found to possess all the attraction of novelty.

Mr. James H. Gibson, Member elect from the Fifth Congressional District of Virginia, appeared and was sworn in.

Bills were introduced and referred as follows:

Mr. KETCHAM (Rep., N. Y.).—For the better organization of the Medical Department of the Navy.

Mr. STRICKLAND (Rep., Mich.).—Granting lands to the Deer Creek and Marble Quarry Railroad Companies, Michigan.

the deeper tissues of final affection. Here is one said to have been the cause and agent of surpassing offense. Her crumbling bones are shaken to wake a bloody phantom of remorse and guilt, striding over the bodies of thieves, in the dark haunts of Magdalens. She cannot speak. The crime of which she is accused is brought forward upon ground which allows neither proof nor disproof. But we say for her, "Is she not a woman and a sister! Must her memory endure the burning hell of shame rather than that Lady Byron's Arctic should be considered as a little under temperature for a luxurious and tropical imagination!" We shall emotionally answer, "No."

I am satisfied that the milk from the cows which milk among children I am satisfied causes sickness and death than all other causes put together. The following tables will show the terrible fact that more than half the deaths recorded each year in this city are of children under five years of age. How can we account for this infant holocaust except from the use of some wholesome food.

The following table of the Board of Health for 1927 shows whole number of deaths in this city to have been Oct. 4, 1926, to Oct. 30, 1927, 9,790; under five years of age, 4,618, or 1,043 more than half of the whole number.
